

Flyingbee PDF Converter SDK

iOS Sample Document (FPPDFSample.pdf)

This multi-page sample file is bundled with the iOS demo apps to let you exercise PDF conversion without picking an external document. It contains selectable text (vector, not scanned) plus simple vector graphics so you can compare Word/HTML/Image output fidelity.

What you can try with this file:

- * Convert to DOCX / PPTX / XLSX / CSV / TXT / RTF / HTML
- * Convert pages to JPEG / PNG / BMP / GIF / TIFF / TGA / JPEG2000
- * Extract structured content as Element XML
- * Apply page ranges (all / first 10 / first 3 / first page / custom)
- * Enable OCR on text pages for language coverage checks

Page layout intentionally keeps margins and styles simple, which makes the generated Office documents clean and easy to inspect.

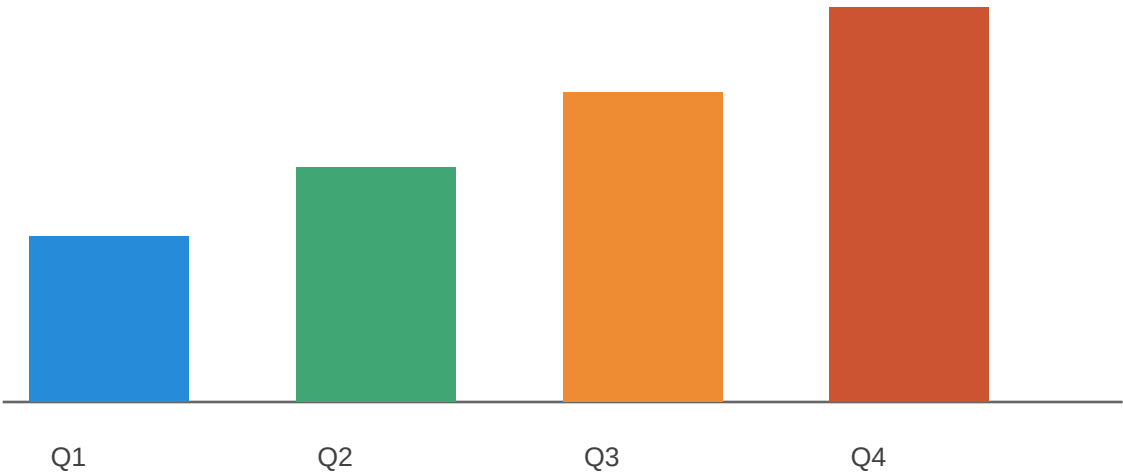

Page 2 - Tables and Charts

The grid below is drawn with vector rectangles; text sits on top. In Excel output this kind of content maps to cells and row/column layout.

Quarterly build metrics (fictional)

Quarter	Builds	Crashes	Crash-free		
Q1 2026	142	12	0.9%		
Q2 2026	168	9	0.7%		
Q3 2026	191	7	0.5%		
Q4 2026	205	5	0.4%		

Vector bar chart (from the same page source)

Page 3 - Format Coverage Notes

This page mixes heading text with larger display text. Use it to check that vertical and horizontal spacing survive conversion, and that text streams are re-flowed (HTML text-flow mode) or kept page-exact.

Supported output formats

Word (.docx) PowerPoint (.pptx) Excel (.xlsx)

CSV (.csv) Text (.txt) RTF (.rtf)

HTML (.html) Element XML Images (7 formats)

Sample text meant for OCR verification

The quick brown fox jumps over the lazy dog. 0123456789

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz

PDF conversion SDK demo - page three - flyingbee software

Note for OCR tests: enable OCR + image scan with chi_sim+eng and render this page at 300 DPI to exercise the full pipeline.

Page 4 - End of Sample

This final page is intentionally sparse. A short paragraph and a few markers below let you confirm that page order and trailing content are preserved end to end (4 pages total).
